

**Hey BAHC members!** Spring will soon be around the corner and that means many of you will look into the garage and (hopefully) think about preparing your Austin Healey for those great upcoming spring club drives. The Bonneville Austin Healey Club will be kicking off some of the 2018 season club events with our first **Tech Session on Saturday April 21 at 10 am. We will meet at Jim Thornton's shop at 63 W. Truman Ave. (2330 So.)**. Darin Graber, new club vice-president, will be talking about preparing your car for the upcoming driving season after a winter under a cover.

Topics covered will include, but are not limited to: basic tune-up procedures such as spark plug replacement and gapping, checking compression, distributor issues including points and gap, rotor, condenser and ignition timing, fluid levels and types, wheel inspection and hub lubrication, hydraulic bleeding and speed bleeders, emergency travel packs, and other general maintenance and safety tidbits. The session will be an open forum, so bring your questions, answers and experiences! Coffee and donuts provided! BAHC hopes that this opening Tech Session will encourage some of you "strangers" to pull your Healey from hibernation and join us this year at some club events!

Darin will be using his '57 100-6 as the demo vehicle, but if your Healey needs some TLC and you want YOUR car to be the focus of this session, please email Darin Graber at [dkgraber85@yahoo.com](mailto:dkgraber85@yahoo.com) and lets make it happen! Please contact him at least two weeks in advance of the session. Hope to see many of you there!
